Dejanski prihranki goriva in varnost v cestnem prometu sta v veliki meri odvisni od načina vožnje in vremenskih razmer. Ekološka vožnja lahko bistveno zmanjša porabo goriva. Za doseganje boljšega oprijema na mokri podlagi in izkoristka goriva je treba redno preverjati tlak v pnevmatikah. Vedno je treba upoštevati varnostno razdaljo.
